

"Heron" Multi Them Energy Educational Park (MTEEP) valuation and traffic report (02/2025 – 06/2025)

During the period February 2025 – June 2025, the Multi Them Energy Educational Park (MTEEP) "Heron" showed increased attendance from School Units of the Eastern Macedonia and Thrace Region (EMTh). According to the recorded data, a total of **1065** students and teachers/escorts visited the MTEEP. The **44** school Departments came from **17** schools of Primary and Secondary education of the EMTH Region, as reflected in the diagrams below:

School Units that visited the Heron Park: 17

Geographical origin of School Units

Based on the responses to the **1039** questionnaires completed by students and teachers/guides after the end of the tours, the following conclusions emerge:

1. Did you find the visit interesting?

80% of visitors found the visit to HERON Park **very to extremely interesting**

2. Was the presentation understandable?

The presentation on RES was **very to very understandable** for **80%** of visitors

3. Do you think you have gained a clearer picture of the forms and uses of RES?

72% of visitors believe that **they gained a very or very clear picture** of the forms and uses of RES

4. Did you like that the event was held in the "Heron" Park?

76% of visitors expressed **very to very great satisfaction** that the event was held at MTEEP

5. Do you think it is positive for the school to participate in such activities?;

■ Not at all ■ A little ■ Moderately ■ A lot ■ Very much

Visitors consider it **very to very positive** that their school is open to such activities, at a rate of **79%**

6. Do you think it's positive for the University to organize and participate in such activities?

77% of visitors consider it **very to very positive** that the University is opening up to such actions

7. Would you be interested in participating in this type of action again?

74% of visitors would be **very to extremely** interested in participating in this type of activity again in the future

8. Were the experiments interesting?

Visitors **found the experiments** implemented in the Park **very to extremely** interesting at a rate of **82%**

9. Would you recommend that students participate in similar activities in the future?

78% of visitors would be **very to extremely** interested in participating in this type of activity again in the future

The results of data processing reflect the positive image that visitors obtain at the end of their visit to the HERON Energy Park.

During the five-month period 02/2025 – 06/2025, the MTEEP “Heron” toured students and teachers who came from schools outside the EMTh Region (Thessaloniki, Chalkidiki). It also collaborated closely with the Environmental Educational Center of Maronia, educating students from the EMTh Region on its premises through environmental programs that concern energy issues and inform them about Renewable Energy Sources (RES) and how to utilize them.
